I work across business transformation, AI, data and Web3 product development. As an independent consultant and product manager, I help teams improve processes, build practical systems and turn ideas into working products. My Web3 product work also involves proprietary AI research, and I deliver data and machine-learning training.

EXPERIENCE

Independent Consulting

Apr 2026 - Present
Independent Consultant & Product Manager

- Help teams clarify operational problems, improve processes and translate business priorities into practical systems.
- Manage Web3 product work involving proprietary AI research, product decisions and coordination between commercial and technical contributors.
- Deliver data science and machine-learning training for teams building internal analytics capability.

Quandatics

Apr 2026 - Present | Kuala Lumpur, Malaysia
Contractor, Business Transformation Consultant

- Support finance transformation across order-to-cash, procure-to-pay and record-to-report processes.
- Build data pipelines, workflow automation and reporting improvements around the people responsible for operating them.

Quandatics Academy

Jun 2026 - Present | Kuala Lumpur, Malaysia
Contractor, Data Science & Machine Learning Trainer

- Deliver practical data science and machine-learning training that connects technical methods to real operating problems.

Monash University Malaysia

Dec 2025 - Present | Subang Jaya, Malaysia
Research Assistant

- Develop wastewater treatment prediction models using recurrent neural networks and Transformer architectures on time-series sensor data.

MMI Capital

Aug 2025 - Present | Malaysia
Frontend Web Developer

- Contribute frontend implementation and product delivery for business-facing web applications.

ACTBuilder Actuarial Solution

Jul 2025 - Present | Malaysia
Technical Support

- Provide Python automation and infrastructure troubleshooting for client deployments.

Great Eastern Life Assurance

Oct 2024 - Jan 2025 | Kuala Lumpur, Malaysia
Finance Analyst, Data Engineer Intern

- Built a PaddleOCR document extraction system with orientation detection and table parsing for unstructured medical bills, reaching 97% extraction accuracy.
- Developed repeatable Python and SQL workflows for data preparation, quality control and reporting.

EDUCATION

Monash University Malaysia

Dec 2025 - Present
Master of Engineering by Research, Engineering

Universiti Tunku Abdul Rahman

Oct 2022 - Oct 2025
BSc (Hons), First Class Honours, Applied Mathematics with Computing

- Research focus in cooperative AI and reinforcement learning.

RESEARCH & PUBLICATIONS

The Primacy of Information Design Over Algorithm Selection in Multi-Agent Cooperation

Under review, Apr 2026
Jien Weng Lai, Wei Lun Tan, Ying Loong Lee and Ming Fai Chow, IEEE Social Computation

- Full-factorial Public Goods Game experiments examining how information regimes, incentives and algorithm selection affect cooperation.

Optimal Execution with Alpha Signals

Published, Apr 2026
Jien Weng Lai, SSRN

- Studies optimal trade execution strategies that incorporate predictive alpha signals, bridging market microstructure theory with practical quantitative trading.

SKILLS

- Business & Product: Business transformation, Product management, Process improvement, Requirements discovery, Stakeholder coordination
- AI & Data: Machine learning, Reinforcement learning, Transformer architectures, Data analytics, Data modelling
- Engineering: Python, SQL, React, BigQuery, Supabase, Apache Spark, AWS, Workflow automation
- Domains: Web3, Quantitative finance, Financial operations, Environmental systems

SELECTED RECOGNITION

- Future Founder Award, Top 15 Finalist, Talentbank Boardroom Challenge 2025, Nov 2025
- Best Visualisation Award, 4th International Process Control Competition, Aug 2025
- Consolation Prize, PayHack 2025, Aug 2025
- Best Presenter Award, Best Team Award, 20th LIAM Structured Workshop, Dec 2024
