Jien Weng Lai

Web3 Product Manager | Business Transformation Consultant | Data Science & Machine Learning

Selangor, Malaysia | laijienweng@gmail.com | linkedin.com/in/jienweng | github.com/JienWeng | jienweng.github.io

PROFILE

Product manager and business transformation consultant working across Web3 payment infrastructure, operational improvement, applied AI, data systems, and environmental research. Coordinates delivery across commercial and technical contributors, translates unclear problems into practical systems, and trains teams to use data and machine-learning methods in their own work.

PROFESSIONAL EXPERIENCE

Product Manager | CryptoRails

Malaysia / remote | *Feb 2026 - Present*

- Coordinates an engineering team, assigns work, tracks delivery, and maintains the product backlog.
- Facilitates stand-ups and sprint planning for multi-chain crypto payment and wallet infrastructure.

Independent Consultant & Product Manager

Malaysia | *Apr 2026 - Present*

- Helps teams clarify operational problems, improve processes, and translate business priorities into practical systems.
- Manages Web3 product work involving proprietary AI research and coordinates commercial and technical contributors.
- Delivers data science and machine-learning training for teams building internal analytics capability.

Business Transformation Consultant | Quandatics

Kuala Lumpur, Malaysia | *Contractor* | *Apr 2026 - Present*

- Leads requirements, design, development, deployment, and support of an internal CRM connecting sales, finance, and project teams.
- Builds data pipelines, workflow automation, and reporting improvements around the people responsible for operating them.

Data Science & Machine Learning Trainer | Quandatics Academy

Kuala Lumpur, Malaysia | *Contractor* | *Jun 2026 - Present*

- Coaches analytics teams on customer profiling, segmentation, and roadmap planning.
- Connects technical methods to real operating problems through practical training.

Research Assistant | Monash University Malaysia

Subang Jaya, Malaysia | *Dec 2025 - Present*

- Develops wastewater treatment plant prediction models using RNNs, Transformers, and Markov chain methods on time-series sensor data.
- Works on data infrastructure for continuous sensor ingestion, model development, and downstream analytics.

Finance Analyst / Data Engineer Intern | Great Eastern Life Assurance

Kuala Lumpur, Malaysia | *Oct 2024 - Jan 2025*

- Built a PaddleOCR document extraction system reaching 97% extraction accuracy.
- Developed repeatable Python and SQL workflows for data preparation, quality control, and reporting.

Jien Weng Lai

Selected qualifications and research

CORE COMPETENCIES

Product and delivery: Product management, Scrum delivery, roadmaps, requirements, stakeholder coordination, technical collaboration.

Business and analytics: Business transformation, process improvement, customer analytics, segmentation, data systems, quantitative finance.

AI and engineering: Machine learning, time-series modelling, RNNs, Transformers, Python, SQL, TypeScript/JavaScript, React, Next.js, PostgreSQL, Git, Docker.

Domain: Web3 and crypto payment infrastructure, internal CRM systems, environmental time-series modelling, applied AI research.

EDUCATION

BSc (Hons), First Class Honours | Applied Mathematics with Computing | Universiti Tunku Abdul Rahman

Oct 2022 - Oct 2025

- Research focus in reinforcement learning and game theory.

Foundation in Science | Universiti Tunku Abdul Rahman

Oct 2021 - Oct 2022

SELECTED PUBLICATIONS

Separating spatial support and observation effects in satellite rainfall monitoring over Malaysia

Environmental Monitoring and Assessment, Springer Nature | *Manuscript resubmission* | *Aug 2026*

- Assesses daily IMERG Final V07 rainfall over Malaysia and separates regional rainfall patterns from gauge-footprint and gauge-to-footprint effects.

The Primacy of Information Design Over Algorithm Selection in Multi-Agent Cooperation

IEEE Social Computation | *Under review* | *Apr 2026*

- Full-factorial Public Goods Game experiments examining how information regimes, incentives, and algorithm selection affect cooperation.

Optimal Execution with Alpha Signals

SSRN | *Published* | *Apr 2026*

- Studies optimal trade execution strategies that incorporate predictive alpha signals.

CERTIFICATIONS AND AWARDS

Certifications: Databricks Fundamentals; Front End Development, freeCodeCamp; NVIDIA Deep Learning; IBM Data Science; Google Data Analytics; NLP for Machine Learning.

Awards: Future Founder Award and Top 15, Talentbank Boardroom Challenge; Best Visualisation Award, International Process Control Competition; Consolation Prize, PayHack; Top 13 Finalist, Alibaba Cloud AI Hackathon; 4th runner-up, Universiti Malaya Hackathon.

LANGUAGES

English, Mandarin Chinese, Cantonese, and Malay - native or professional working proficiency.
